

Social Responsibility. Year 2020

- ✓ We familiarize our clients with our regions underwater and coastal biodiversity and how to protect it (e.g. by taking nothing only pictures)
- ✓ We have our own 10 commandments for protecting the environment
- ✓ We offer a great seminar on ways for individuals to actively help the protection of our environment.
- ✓ The seminar is offered in two languages and in two versions, individual and corporate according to who we address.
- ✓ Each month at least we organize a local DIVE AGAINST DEBRI initiative so we can train people on how to clean up the coastal and underwater debris and we actually do it!
- ✓ We certify individuals with PADIS Project Aware certificates, the amount that is paid goes 100% as donation to PROJECT AWARE org
- ✓ We reduce as much as possible the use of plastic and especially single-use plastic in our operations.
- ✓ We prefer (filtered) tap water to bottled water
- ✓ We use our own bottles for water that we fill with tap water (filtered). We suggest to our clients to do the same.
- ✓ We always pick up leftovers and used containers we used, and we recycle all waste.
- ✓ When we have daily initiatives, we ask our clients and staff use the method of carpooling and not take each one his own so we can reduce our carbon footprint.
- ✓ During training dives, we offer mesh bags to our students so they can collect any thrash we may encounter during our dive.
- ✓ Our Green philosophy is clearly displayed on our website and social networks and communicated to all our partners
- ✓ We are a member of ecotourism Greece
- ✓ We are lifelong members of AEGEAN REBREATH SCE
- ✓ We actively support PADI's PROJECT AWARE by matching our student's donation when certifying them for a PADI certification
